\*Relaxation is only in special case where use of any other language is crucial to work presented (Either in tables/ figures or text)

## Evaluation Form dari Reviewer

Literature connection is poor. Cite uptodate work

Also define in paper the results interpretation criteria and is it same or different keeping in view previous literature.

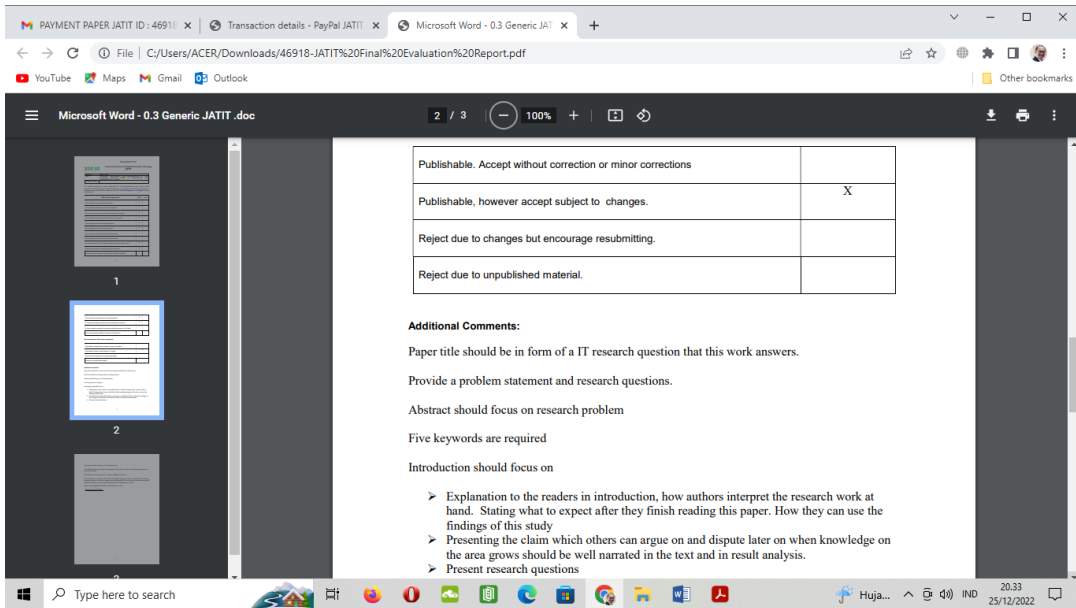

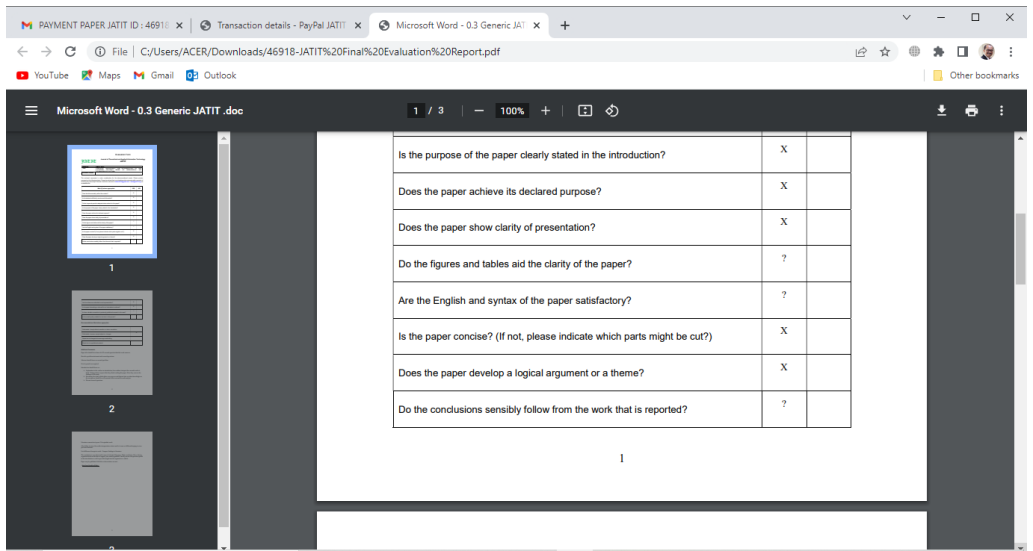

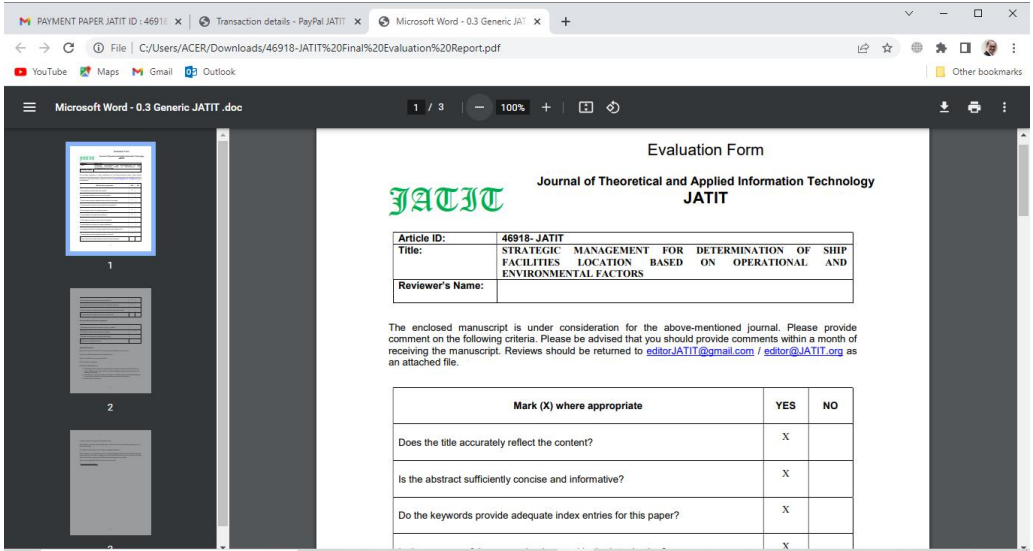

List difference form prior work. Compare findings to literature.

The conclusion is very short and is more of a brief of the paper. Write conclusion like a closing argument based on the data to support your initial hypothesis. Briefly answer the questions posed in the introduction as well as provide insight into the argument as a whole.

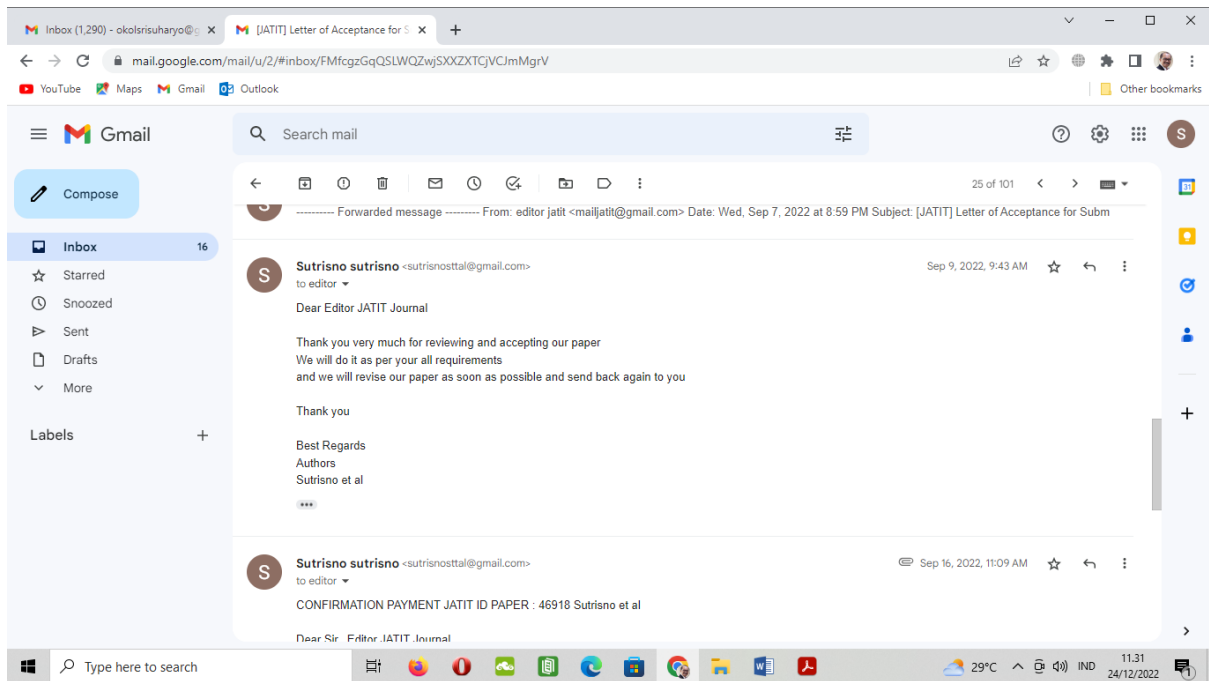

Paper may be published if all above observations are met.
